

HOW TO TAKE CARE OF YOUR SOLAR LIGHT

- Keep it clean and dry
- Do not leave it out in the rain
- Do not leave it near a fire
- Do not let children play with it
- Do not leave it where it could get stolen
- Invite your children and grandchildren to enjoy it in your house, not in theirs
- When you put it in the sun to charge, turn the black panels towards the sun. It will show that it's charging by flashing. When the flashes become very fast, it is fully charged.
- Turn it off when you're not using it
